AGROWTEK
Technology to Help You Grow

GCX*mini*
Cultivation Control System

GrowControl™ GCX*mini* Cultivation Control Systems have all of the same software features as the standard GCX and GCX+ models, but with a smaller screen and device count. The GCX*mini* is the perfect controller for a single zone in commercial environments, or as a complete control system for a hobby garden.

Built on over a decade of commercial experience, Agrowtek's GCX controllers are the most advanced and economical in the industry. Up to sixteen (16) GrowNET devices of your choice can be connected to the GCX*mini* system allowing many configuration options from a basic multi-zone control for climate or irrigation, to a fully loaded single-zone.
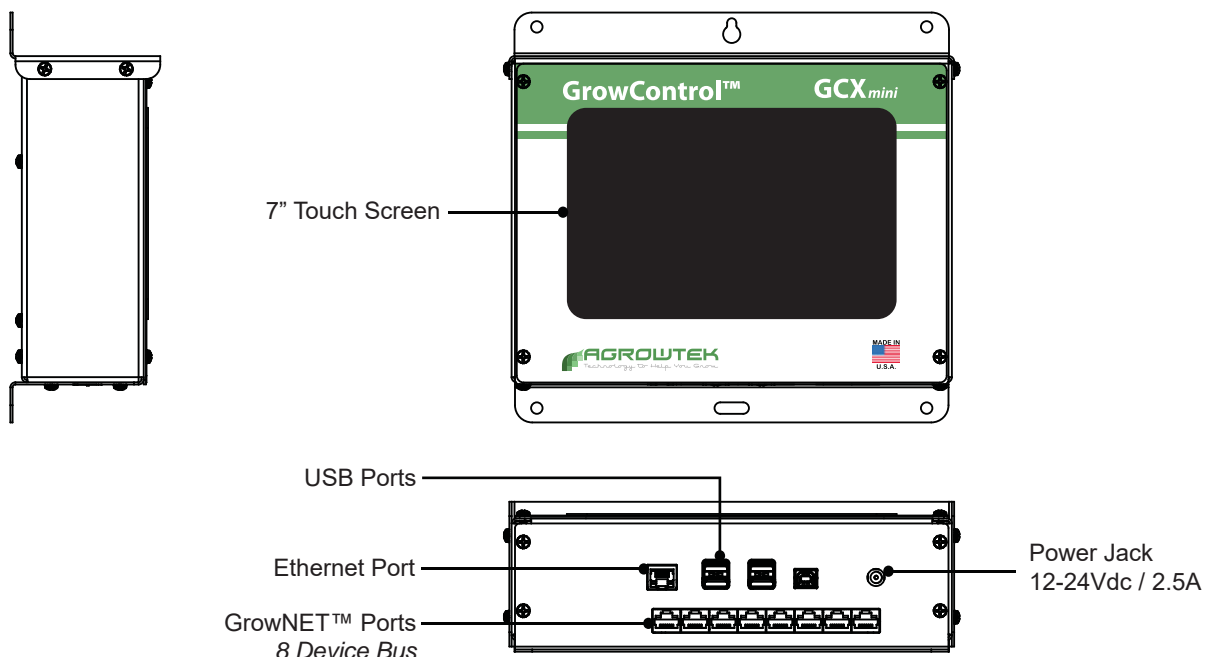

Standard Ethernet network interface connects the GCX*mini* to the internet for free email alerts, remote access and online updates. USB ports for data logging to memory stick, optional WiFi module and more.

Features

16 Connect up to 16 Devices
Sensors, I/O Modules, Dosers, etc.

8 GrowNET Ports for Devices

Multi-zone Capable

Expandable
Add Devices as Your Needs Grow

Easy to Setup & Operate
Intuitive Interface, On-screen Help

Quad-Core Processor
Efficient & Powerful

Internet Enabled
Email Alerts, Remote Access

WiFi optional

No Software to Install
No Computer to Crash

Powder-Coated Aluminum
Tempered Glass Screen

Made in USA

3-Year Warranty

Hardware

7" Touch Screen
